**Introducing** two new and exciting “front-feed” printers for today’s multi-channel needs with 5 interfaces plus Hub functionality - All packaged in a compact and elegant design for your counter top solution

***m*C-Print2** 58mm wide paper model just 96 x 115 x 100mm (w x d x h)

***m*C-Print3** 80mm wide paper model just 132 x 140 x 125mm (w x d x h)

The One Solution for all platforms

Seamless & Reliable

for Traditional or Tablet POS

HUB

5+ HUB  
INTERFACES

**ALL-in-One** Traditional & Tablet POS Printers

## Multiple Peripheral Hub Functionality

Reduce overall hardware costs by using select USB peripherals with single connection (USB/LAN or Bluetooth) to the host Terminal or Tablet with black or white versions of Star SCD222, 2D DS9208 or 1D scanner.

# Star mC-Print™

Unique & Ground breaking interfaces on even the basic 80mm model **Traditional USB, Lightning USB & Ethernet**

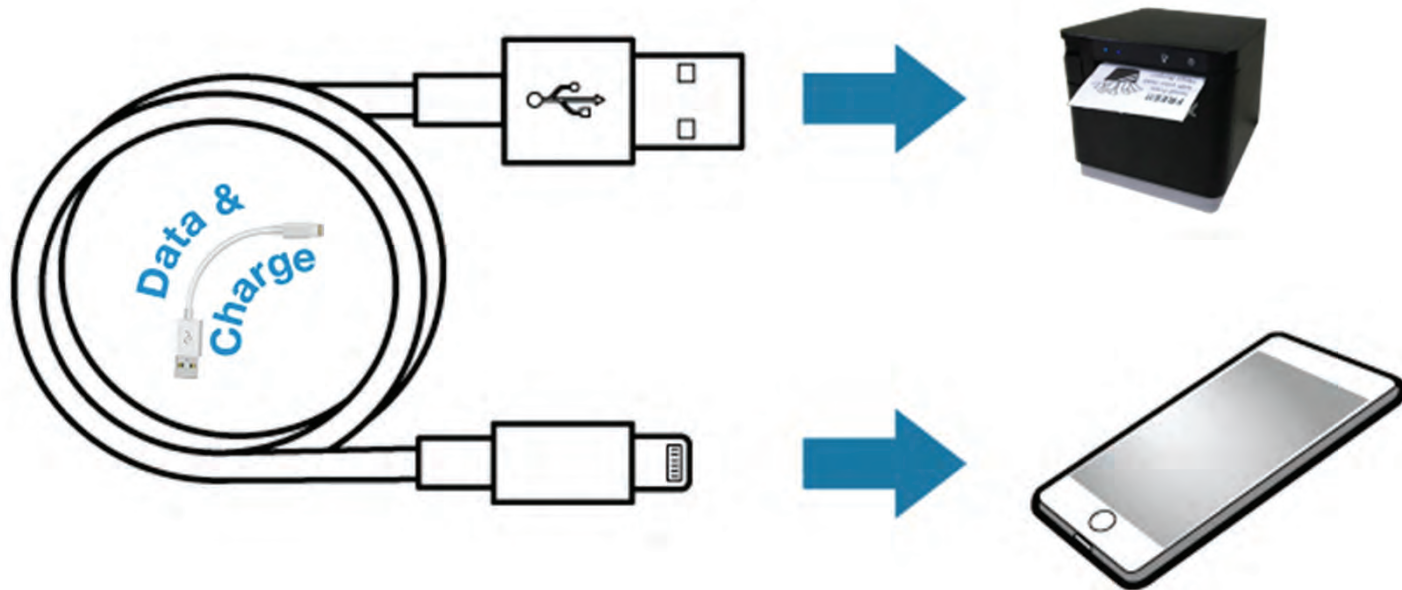

**Data & Charge**

**Premium Model Bluetooth & CloudPRNT**

## Unique Lightning USB

The **ONLY** USB Printers to “directly communicate” with Apple iOS devices with MFi certification

The adoption of Tablet POS by retailers & restaurateurs of all sizes has been hindered by concern for communication and connectivity issues with cable-free communication being affected by obstacles such as brick walls , fridges or even microwaves.

**mC-Print2™**

**mC-Print3™**

**High speed** up to 250 mm/second

**IPX Splash Proof design** with soft operating switches (total software control providing more flexibility, “protected” control boards and insect prevention design

**Easy Ethernet Set-up** Static IP Address set-up using Star Utility (Native) via USB

**Star Cloud Services Ready** with Digital Receipting, Internet Device Management already on board

**Thin Paper Support** 53 micron

# EASY INSTALL / INTEGRATION

## saving time & money

We are always proud to be told that Star provides the best Integration tools available & this product will be no exception

### **Integration**

The StarPRNT SDKs for all Star POS printers will be updated using Star standardised code for integrators

### **Provisioning**

Simplified provisioning using Star supplied native utilities for iOS and Android in addition to web based configuration.

The traditional StarPRNT intelligence driver for Windows devices will also be available at launch

# EASY INSTALL and USE

## saving time & money

We are always proud to be told that Star provides the best Integration tools available and this product will be no exception

### **In-Store**

1. Easy Ethernet Set-up Static IP Address set-up using Star Utility (Native) via USB
2. Direct Lightning cable connection for simultaneous high speed receipt printing, status & charging. All the benefits of a wired printer with the flexibility to undock and sell on the shop floor via Bluetooth or network  
(check Software is integrated)
3. One printer for most applications offering redundancy around the store & reducing hardware / training costs.

star<sup>m</sup>C-Print™

star<sup>cloud</sup>PRNT

**Cloud connectivity** for local as well remote networks – perfect for PC-free restaurant aggregation or Click & Collect type applications with sophisticated remote management & control of Star select USB peripherals

**“2 printers in one”** Star CloudPRNT can work alongside the POS receipt function so the printer can be used simultaneously for in-store Receipting & Cloud based orders
